Washington, April 28-The National mateur Athletic Federation has no intention of antagonizing the amateur athletic union. Colonel Robert M. Thompson, president of the American Olympic association, declared in statement issued here today after con ferences with the representatives of the army and navy, the National Col-legiate association, the Y. M. C. A., and other athletic bodies which recently combined to form the federation.

The growth of the country, the of ial introduction of athletics into the army and navy, the development of the Boy Scouts, the encouragement sports among their employes and oth er activities the statement added, have disclosed that there is a con-siderable section of the United States which has not been properly or ade-quately organized for amuteur athletics. It is the hope of the fedoration to take care of these sports. They recognize the necessity of having a representative Olympic association, and it is my hope that an agreement may be reached under which the several associations which form the federation will join the Olymptic asso lation, thus assuring a hearty co-op eration among all the governing bod-dies interested in athletics."

THE STANDARD OF THE WORLD

Eight years ago, Cadillac introduced America's first eight-cylinder automobile power plant, the V-Type Cadillac Engine.

It achieved an immediate and a brilliant success, later enhanced by distinguished service with the American Expeditionary Forces in France.

Today, after years of painstaking development and refinement, the Cadillac Engine attains an extraordinary degree of perfection in the Type 61. Not only Cadillac owners, but practically

all motorists praise its superb power flow and its consummate quietness of operation. They refer in glowing terms to its de-

pendability, emphasizing that it functions

with a constancy and a certitude that suggest infallible performance.

But the great and the cardinal triumph of the Cadillac engine is that it perpetuates this service; it continues running surely and serenely throughout its long life.

The motoring public admires this eightcylinder power plant, not only as a Cadillac achievement, but as the splendid evidence of American supremacy in multi-cylinder construction.

In it, they see typified the qualities that cause the Cadillac car to be regarded as the Standard of the World.
